FBH Japan, the overseas arm of France Bed Co., Ltd, will exhibit innovative assistive products for persons with dementia at 32nd International Conference of Alzheimer's Disease International.

Tokyo, Japan (April 20, 2017) – FBH Japan, the overseas arm of France Bed Co., Ltd, represented by the president & C.E.O. Mr. Shigeru Ikeda, will exhibit at the stand No.3 at the 32nd International Conference of Alzheimer's Disease International. (April 26th (Wed.) –April 29 (Sat.) in Kyoto, Japan).

The annual conference of Alzheimer's disease International is one of the world's largest and most important conferences on Alzheimer's disease and dementia. Hosted with a different Alzheimer association around the world each year, the conference continues to evolve and now attracts thousands of specialists from over 100 countries around the world.

FBH Japan will exhibit many innovative products, which benefit the persons with dementia and the family caregivers during the conference. The Floor Bed "FLB-03" which can be lowered down to a height of 11 cm, reduces risk of falling out of the bed during sleep. The safety wheelchair "Koroba-Nice" and "Safety Orange" can avoid falling down from wheelchair due to forgetting applying brakes. Besides, the monitoring sensor system "Odekake" and "M-2" help to detect the wondering of persons with dementia. Many other innovative products which must surprise visitors will be exhibited.

As a leading company which supports Japanese aging society, France Bed has been offering various kinds of assistive products and high quality services for the persons with dementia and their family for a long time. Through the conference, France Bed would be glad to share the experiences and innovative products cultivated in Japanese market, to increase the life quality of persons with dementia, their family, and the caregivers all over the world.
